SETTING CHANGES

STEP 1: -- CHANGE SECURITY SETTINGS

Go to "Tools" and select Internet Options. This will open the Internet Options box below. Click on the Security tab at the top of that box.

Be sure and make the changes below and at "COOKIE SETTINGS."

If you are using IE10 you may need to press the Alt key in order to see Tools.

STEP 2:

Click on Custom Level in the Internet Options box. This will then open the box Security Settings - Internet Zone on the right.

STEP 3:

A. In the Security Settings - Internet Zone box scroll down midway in the box and be sure that "Access data sources across domains" is checked for Enable.

B. Scroll several more lines down to "Display mixed content" and be sure Enable is checked.
